

CHANGE LOGS:

iRacing BETA Interface

- Improved performance on the User-Created Races page, and modal menus.
- Fixed lag when clicking on navigation items in the Series modal menu.
- Fixed an issue where clicking "F" or "C" repeatedly in the Set Climate tab would increase or decrease the temperature exponentially.
- When creating a Hosted Session, the selected Damage setting now appears in the Summary Page.
- Test Drive now auto-saves when the settings are reset.
- Tooltips have been added to the Damage toggles to better explain the state.
- Decreased processing time during login handshake.
- Fixed a display issue where the pre-selected time of day and starting time may not have matched when the Session was created.
- Resolved an issue where clicking a date/time picker and then not choosing a date could cause a reference error.

iRacing Membersite

- Fixed a Simulator launch error issue with the "Test Car on Track" button under the "Race Now" section for cars in Series with Fixed Setups.
- League seasons now display in the header the number of races counting toward the Season standings.

Heat Racing

- Fixed an issue in Heat Racing events with Stacked Consolation Races.
- The system was failing to properly advance drivers from the Final Consolation Race into the Feature Race, and failing to finalize the starting grid for the Feature Race.

Dirt Racing

- The default starting track usage value for Dirt Oval Sessions (Practice, Qualify, and Race) has been

reduced.

Rendering

- Fixed an issue that was causing darkness when the Shader Detail Level was set to "3".

Admin Commands

- The help text for the "!trackstate" command has been shortened.

Peripherals

- The Fanatec SDK in use has been reverted from 3.4.1 to 3.3.

- - Users may need to reinstall drivers to get their wheel to link properly.
